Education

Georgia Institute of Technology **Atlanta, USA**
Master's of Science in Computer Science *Aug 2026 - Dec 2027(Expected)*

International Institute of Information Technology, Bangalore **India**
Integrated B.Tech + M.Tech in Computer Science *CGPA: 3.45 / 4.0* *Aug 2015 - Jul 2020*

- Dean's Merit List Scholarship (Top 10% of cohort).
- ACM ICPC Chennai Regional Qualifier.

Experience

Gigin.ai **Bangalore, India**
Software Engineer III *Oct 2024 - Jun 2026*

- **Designed and implemented a hierarchical multi-agent orchestration system** for hiring workflows, coordinating task-specific agents using a mix of deterministic rules and LLM-based intent classification; leveraged retrieval-augmented context and human-in-the-loop escalation to ensure robust production decisions.
- **Architected and owned the end-to-end KYC verification module** for an AI-powered hiring platform, integrating document parsing, validation pipelines, and compliance workflows.
- Owned and maintained multiple development and production environments, **improving engineering throughput and release velocity by ~20%**.

CosX.ai **Bangalore, India**
Software Engineer *Jun 2024 - Oct 2024*

- **Designed an AI-assisted document analysis system** for auditing firms, combining NLP-based classification, information extraction, and completeness checks and generate audit-ready reports under regulatory constraints.

Microsoft **Hyderabad, India**
Software Development Intern → Software Developer *Jan 2020 - Mar 2022*

- **Integrated large-scale text prediction systems into mobile editors**, analyzing prediction timing, UX trade-offs and performance constraints.
- Implemented and tested **Intelligent Reflow Mode**, focusing on dynamic layout reconstruction, style preservation, and performance constraints on Microsoft Word mobile.
- **Integrated text-to-speech pipelines into Microsoft Word (Android)**, evaluating latency, voice quality, and accessibility trade-offs across devices and languages; deployed to 10M+ users.

Microsoft **Hyderabad, India**
Software Development Intern *May 2019 - Jul 2019*

- Built a proof-of-concept (POC) text-to-speech feature and integrated it into the mobile version of Microsoft Word, exploring speech synthesis pipelines and performance constraints.

Research Activities

AI/ML-based eBook Generation - Faculty-Guided Research Project

- Worked under Prof. B. Thangaraju on applying NLP and machine learning techniques to process and collate unstructured PDF documents into structured eBooks; explored text segmentation, metadata extraction, and layout normalization to improve content coherence and readability.

Intelligent Document Reflow - Research-Oriented Systems Project

- Investigated algorithms for automatic reflow of unstructured documents on mobile devices, focusing on text tokenization, paragraph boundary detection, and style preservation under performance constraints; analyzed failure cases across heterogeneous document layouts and documented findings in a final technical report.

Reinforcement Learning for Pac-Man Optimization - Course Research Project

- Worked under Prof. Shrisha Rao to model Pac-Man as a Markov Decision Process and applied reinforcement learning techniques to learn optimal policies; analyzed reward shaping, state representations, convergence behavior, and evaluated agent performance across multiple game scenarios.

Academic Engagement

- Teaching Assistant - Operating Systems & Operating Systems Lab.

Extracurricular Activities & Leadership

- **Professional Gaming (2022-2024)** - Rank 1 NA Hearthstone Mercenaries, Rank 5 NA Teamfight Tactics.
- Captain, IIIT-Bangalore Basketball Team; Tournament wins at SIBM (2017, 2018) and SSMC (2018).
- Organizing Committee Member - Infin8 (Cultural Fest) and Spandan (Sports Fest).
