Experience

Gigin.ai

Software Engineer III

Bangalore, India

Oct 2024 - Jul 2025

- **Designed and built a hierarchical multi-agent orchestration system** for large-scale hiring workflows (screening, KYC, onboarding, payments), centered around an orchestrator agent coordinating task-specialized agents; combined deterministic control logic with LLM-driven components for intent classification, document interpretation, and decision prioritization, grounded via retrieval-augmented internal state and human-in-the-loop escalation to ensure robust decision-making in production.
- **Architected and owned the end-to-end KYC verification module** for an AI-powered hiring platform, integrating document parsing, validation pipelines, and compliance workflows.
- Owned and maintained multiple development and production environments, **improving engineering throughput and release velocity by ~20%**.

CosX.ai

Software Engineer

Bangalore, India

Jun 2024 - Oct 2024

- **Designed an AI-assisted document analysis system** for auditing firms, combining NLP-based classification, information extraction, and completeness checks to identify missing artifacts and generate audit-ready reports under regulatory constraints.
- Built authenticated frontend applications using Next.js, React, OAuth2, and NextAuth.

Microsoft

Software Development Intern → Software Developer

Hyderabad, India

Jan 2020 - Mar 2022

- **Integrated text-to-speech pipelines into Microsoft Word (Android)**, evaluating latency, voice quality, and accessibility trade-offs across devices and languages; deployed to 10M+ users.
- **Integrated large-scale text prediction systems into latency-sensitive mobile editors**, analyzing prediction timing, UX trade-offs, and failure modes under strict performance constraints.
- Implemented and tested **Intelligent Reflow Mode**, focusing on dynamic layout reconstruction, style preservation, and performance constraints on Microsoft Word mobile.

Education

International Institute of Information Technology, Bangalore

Integrated B.Tech + M.Tech in Computer Science

India

Aug 2015 - Jul 2020
